Administrator view – teaching

Note – selecting a unit does not restrict the view in the other slots – no easy way to find some faculty from a department. In some views the functionality works as it should (selecting a college restricts the department view, etc.), in others it doesn't.
Summary research report view

Note the use of uninformative 3-D bar plots and repeated color schemes making it impossible to separate out different colleges.
Research productivity view

Note that reports are broken by artificial category – journals are separated from conferences, and finding refereed works requires one to go through multiple reports.
